

Acrylitex[®]

QWIK PREP[™]

Interior Prepcoat

ACRYLITEX QWIK PREP[™] is a fast drying primer designed to equalize the porosity differences between the drywall face paper and joint compound in new drywall construction. Qwik Prep has excellent hide and is very white in color so you can easily see your new pattern when spraying texture. It provides a uniform surface that minimizes “Joint Banding” and “Photographing” of the finish coat.

Fast drying

Excellent hide

Minimizes “Joint Banding” and “Photographing”

Non-abrasive equipment friendly product

VOC compliant

Coverage: Apply at 300–400 square feet per gallon for optimum hide.

Application: Apply product at can consistency. No thinning is necessary. Brush, roll, or spray application.

Dry Time: The average dry time for Qwik Prep is 15–20 minutes @ 70°F and 50% relative humidity.

Cleanup: Wipe up drips and spills immediately with a wet cloth. Clean tools with soap and water.
